**RESUBMISSION OF SEQUENCE LISTING**

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

In a communication from the Patent Office mailed April 11, 2003 applicants were made aware that the Scientific and Technical Information Center (STIC) experienced a problem when processing the computer readable form (CRF) of sequence listing. Applicant therefore now submits a substitute CRF and paper copy of this sequence listing.

It is believed that there is no fee in connection with this re-submission. However, if there is a fee, please charge our deposit account No. 19-0733 for that amount.

Amendments to the Specification

Please replace the paper copy of the sequence listing immediately following the claims with the attached substitute Sequence Listing.

Remarks

The substitute copy of the sequence listing has been amended to delete the description of the sequences as being "[o]ligopeptide[s] for conjugation of radiolabel to an antibody" in the miscellaneous feature fields as redundant over the "[o]ligopeptide[s] for conjugation of radiolabel to an antibody" descriptions in the artificial sequence fields. The substitute copy of the sequence listing introduces no new matter. I believe that the content of the paper and computer readable format copies of the sequence listing are the same.

Respectfully submitted,

By 

Michelle Holmes-Son
